Subject: RE: 17-mile LPRSA Draft RI Report Submission

Hi Rob,

We want to make sure we are interpreting the content of the appendices that were not uploaded with the rest of the draft RI report correctly.

Could you please send me a list of the data reports that are included in Appendix B. Do each of these have a corresponding validation report in Appendix C? Are any data collection efforts included in Appendix C that are not covered in Appendix B?

Appendix D contains the BHHRA and BERA (drafts for now)? And is there anything to say about the database in Appendix E?

Not completely related, but as for the reports in Appendices B and C, in addition to several other reports, it might be worthwhile to have another scheduling/status call with CDM like we've had in the past.

Thanks,
Stephanie

Subject: 17-mile LPRSA Draft RI Report Submission

Stephanie:

The draft 17-mile RI Report prepared by the CPG and its technical consultants (Anchor QEA, AECOM, Woodward, and Moffatt and Nichol) has been uploaded to EPA's LPR Sharepoint.

- Attached is CPG's transmittal letter and an accompanying attachment containing CPG's August 2014 Site-Specific Human Health Risk Assessment prepared by AECOM.
- Section 7 - Summary of Modeling Results for the Lower Passaic River Study Area will be included in a separate submission in the next several weeks. I will note that EPA has been provided with the CPG's latest modeling code and calibration results for the HST (August 2014), CFT (January 2015) and bioaccumulation modeling (February 2015). The CPG looks forward to working with EPA and finalizing the modeling for the 17-mile LPRSA RI/FS in the near future.
- Appendices B-E are the RI analytical data, data characterization reports, data validation reports, risk assessments previously submitted to EPA and are not included again in this submission.

Please contact Bill Potter or me with any questions.

Thank you.

R/

Rob
